Professional Summary

I'm a Full Stack Software Engineer with over 1 year of hands-on experience in full-stack web development, primarily working with React.js and Node.js. I'm passionate about building scalable web applications and continuously expanding my skills, with a particular interest in backend architecture, microservices, Docker, and Apache Kafka. I'm eager to learn new technologies and best practices to build reliable applications and deliver better user experiences.

Education

Can Tho University — Can Tho, Viet Nam

Bachelor of Computer Science — *Sep 2021 – Aug 2025*

- GPA: 3.74/4.0 | Honors & Awards: 4× 100% Merit Scholarships & Top 3 Student in the major

Experience

TMA Solutions — Dec 2025 – Present

Fullstack Developer — *Ho Chi Minh City, Vietnam*

- Built frontend components with ReactJS and integrated them with backend services
- Developed backend APIs using NestJS for web applications and core business features
- Designed database schema and structure for core system modules
- Optimized data fetching and database queries, reducing response time by around 20–30% and mitigating performance issues such as N+1 queries.
- Adopted TanStack Query for data fetching and server-state management, reducing boilerplate code and improving the maintainability of frontend components.
- Implemented multi-language support for Vietnamese and English using react-i18next, enabling a localized experience for Vietnamese customers.
- Created responsive and mobile-optimized components with smooth animations and transitions, contributing to an enhanced user experience and professional interface.
- Built and maintained an education management system serving approximately 4,000 users
- Collaborated with team members in Agile/Scrum sprints for feature development, debugging, testing, and code reviews
- Leveraged AI-powered development tools such as Cursor and Antigravity to assist with code development, debugging, and refactoring, improving overall development productivity.

FPT Software — April 2025 – Aug 2025

Fullstack Developer — *Ho Chi Minh City, Vietnam*

- Implemented responsive UI components with ReactJS and Tailwind CSS for internal platform features
- Built 20+ RESTful APIs with ExpressJS and integrated them with frontend components to support core platform workflows
- Independently developed a small-scale e-commerce project to explore microservice architecture, Docker, and Apache Kafka, gaining hands-on experience with containerization and asynchronous communication.
- Participated in daily team sync-ups to provide progress updates, discuss blockers, and align on development tasks.

Projects

RubyStore | *React.js, Node.js, MongoDB, Redis, Docker* | GitHub — April 2025 – Sep 2025

- Built responsive React + Redux frontend and full RESTful API backend
- Implemented authentication & authorization using JWT and Firebase OAuth
- Developed real-time chat & notifications with Socket.IO
- Created admin dashboard for product, order, user, and voucher management
- Significantly reduced API response time (around 30–40%) by applying Redis caching
- Collected large-scale data (16k+ products, 6k+ reviews) using Python for future recommendation features
- Containerized and deployed the system using Docker & Docker Compose

Technical Skills

Languages: Typescript, Javascript
Frontend: React.js, Zustand, Redux, React Router, TanStack Query, Shadcn UI, Material UI, Tailwind CSS
Backend: Node.js, Express.js, Nest.js
Databases: PostgreSQL, MySQL, MongoDB, Redis
Tools: Docker, Git, Github, Gitlab, Jira, Postman, Bruno

Languages

IELTS 6.5 - Fluent in reading, intermediate in speaking
